

Universal Laws **Red Spirit Energy Healing**

Red Spirit Energy Healing © 2012 www.red-spirit-energy-healing.com

Law of mentalism

Everything is created by the mind. You create the world around you through your thoughts and focus; focus on the negative aspects and you will create or attract more of the same. Whatever the input from whatever dimension, the information is still processed by the mind.

Law of correspondence

As above, so below...as below, so above. The laws apply to all dimensions, not just the world we see; what we do to one affects the other. This is seen in the left, right brain concept. Left brain controls right side of the body; right brain controls left side of body. Chakras are similar, front back, crown and base...everything balancing.

Law of polarity

Goes hand in hand with correspondence and gender. Everything has a balancing opposite; Yin & Yang; Male & Female. Again this can be seen in the body with the left side representing the feminine and emotions, while the right side is masculine and logical.

Law of vibration

Everything is vibration or energy; nothing is at rest. Like attracts like on a vibrational level; conversely vibrations will also be attracted to other frequencies that will balance them, as in opposites attract.

Law of cause and effect

What you put out, you get back; every action has a consequence or ripple effect. This is not karma with rewards and retribution, just balancing actions; it's an extension of the law of vibration.

Law of transmutation

Energy can neither be created nor destroyed; therefore nothing dies, only changes form. Perpetual transmutation is energy transferring into matter and out again to energy, thereby keeping balance.

The Law of Gender

Everything has its masculine and feminine aspects or duality. As described in the law of polarity. When these aspects are out of balance, dis-harmony and dis-ease may result. When working with beings from higher realms, you cannot discern whether they are male or female as they are perfectly balanced.

Law of rhythm

Nothing stays the same; everything flows. Everything runs in cycles; the tides, the moon, the female cycle, the seasons and planetary cycles all have an effect on us...and on it goes through the universe maintaining a constant balanced flow. If the balance is disrupted, then there are consequences.

Law of relativity

There are no absolute truths; there is no good and evil; right or wrong. Nothing has meaning until you ascribe meaning to it, or relate it to something else. Whatever occurs, you choose the meaning to give it.

Universal Laws apply to every being and all energies in every universe, whether you or they are aware of these laws or not. Consider them like the laws of physics...you can't escape them. The Law of Relativity is my favourite and states that nothing has meaning until you give meaning to it. Whatever happens to you in life, you have the power to give the experience a positive meaning or a negative meaning. You can also choose not to give it any meaning at all. I believe it can be the most powerful law available to us if we put it to use.

You will notice that there is no law of Free Will. With regards to Free Will, it was once described to me that, "There is Law and there is the nature of the Universe. Free Will and Choice are the nature of the Universe." My interpretation is that Free Will is a right to choose rather than a law set in stone. The question is do we always get to exercise that right? Are we always aware of the consequences of that choice? Whatever happens to us, at some level we have given our consent through choice.

Aspects of the universal laws can be seen in the tiniest cell to the planetary systems. The laws of correspondence, gender and polarity are the most obvious. In the body, the left brain controls the right side of the body; the right brain controls left side of body. Generally speaking, the left side represent the feminine and emotions, while the right side is masculine and logical. When these aspects our out of balance, dis-harmony and dis-ease may result. In the planetary system, the moon is feminine energy and the sun masculine. You cannot have one without the other. Dr Jill Bolte Taylor gives a brilliant description of this in her video presentation "A Stroke of Genius" on our web site. <http://www.red-spirit-energy-healing.com/energy-healing.html>
